

# Bring this One-Day Workshop to Your Nursing Staff

## ***Integrating Coaching strategies and Labor Support Tools into L&D Nursing; A Pathway to Patient-Centered Care and Safe Vaginal Births***

This one-day workshop is approved for 8 CE credit hours by the California BRN. The workshop is aligned with the vaginal birth initiative and with maternal care reforms in the direction of eliciting patients' engagement and patient-provider partnership in L&D. It's dynamic, eye-opening, and leaves nurses eager to connect with their patients in a satisfying and empowering way for both parties of the relationships.

### ***Some Practical information to help get your workshop booked***

- Each participant receives a printed guide and a certificate of completion
- The most powerful results occur when the entire L&D nursing staff is trained
- The optimal number of participants per workshop is 12, but we will train up to 14
- We will bring educational material and props to support the learning experience
- We will share a list of props for your facility to provide for a successful workshop
- We will gift your institute with a copy of our audio-visual guide '*Practicing for an Active Birth*' (USB key) to allow the nursing staff to continuously refresh their labor support tools
